I have data to support the above surface water use reductions due to conservation efforts. YES ____ NO ____

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Web-site at <http://www.srcc.ca.gov>.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Division and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

statements of water diversions and use must be made by riparian and pre-1974 appropriative water users as set forth in Water Code section 3100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

An appropriate right is required for use of water on non�parian land and for storage of water. Generally, appropriate rights may be exercised only when there is a surplus not needed by non�parian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "origin" to the natural stream system.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severer. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

I understand that it may be necessary to document savings claimed in "F." above if credit under Water Code sections 1010 and 1011 is sought in the future.

I have data to support the above surface water reductions due to conjunctive use efforts. YES NO

If credit toward use under a claimed pre-1974 appropriate right through substitution of groundwater in lieu of appropriated water is claimed under section 101.5 of the Water Code, please show the amounts of groundwater used:

Are you now using groundwater in lieu of surface water? YES NO

3. Conjunctive use of surface water and groundwater

I have data to support the above surface water use reductions due to wastewater reclamation. YES NO

b. If credit towards use under a claimed pre-1974 appropriate water right through subdivision or reclaimed water, less than or equal to the amount of reduced diversions and amounts of reclaimed water used;

Are you now of have you been using recycled water more a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES NO

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockpond Construction Prior to 1969"
- "Appropriation of Water in California"
